THE DECLINATION OF THE COMPASS NEEDLE 1957

The declination of the compass needle at any place along a red line is the declination given on that red line. At other places the declination is between those given on the neighbouring red lines; thus at the place marked A, the declination is between 29°00'E and 29°15'E. The declination of the compass needle is decreasing 2.6 minutes annually.

Produced and printed by the SURVEYS AND MAPPING BRANCH, DEPARTMENT OF MINES AND TECHNICAL SURVEYS, 1959, from air photographs taken in 1953.
