MINER
18 NOV 1985

An agreement between **Golden Eye Minerals** and **Teck Corp.** will see the former's lead-zinc-silver-germanium property near Salmo,

B.C., drilled by Apr. 1, 1986. Under the agreement, Teck must drill up to 8,000 ft. and spend \$400,000. By that time, Teck also has options on stock which would ultimately see it take control of Golden Eye.
