Dec 8/86 N Miner
Golden Eye drilling

Diamond drilling has resumed on the Red Bird project controlled by **Golden Eye Minerals**. Located near Salmo, B.C., the property has several high grading zones of base metal mineralization, including germanium and silver. *B2F5W024*

Previous operators have outlined four mineralized zones, two of which have tonnages of 2,400 tons per vertical foot. Golden Eye plans to drill 6,500 ft in order to test for the down plunge extension of the **Red Bird and Annex zones**.
