APPROXIMATE OUTLINE OF EXPLORATION AREA (1981)

Refer to this Map as: 104 K EDITION 1 ASE SERIES A 501

WESTERN LIMIT EXPLORATION AREA

GRID ZONE DESIGNATION 8V	TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METRES:
100,000 M. SQUARE IDENTIFICATION: NA PA / NV PV	SAMPLE POINT — HORIZONTAL CONTROL POINT
IGNORE the SMALLER figures of any grid number; these are for finding the full coordinate. Use ONLY the LARGER figures of the grid number: example 570000	1. Read letters identifying 100 000 metre square in which the point lies. 2. Locate from VERTICAL grid line to LEFT of point and read LARGE figures labeling the line either in the top or bottom margin, or on the line itself. Estimate tenths from grid line to point. 3. Locate first HORIZONTAL grid line BELOW point and read LARGE figures labeling the line either in the left or right margin or on the line itself. Estimate tenths from grid line to point.
	SAMPLE REFERENCE: PA 0 2 1 1 — PA0211
	If reporting beyond 10° in any direction, prefix Grid Zone Designation as: 8VPA0211

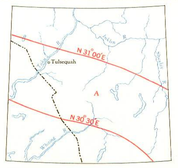
THE DECLINATION OF THE COMPASS NEEDLE, 1954



The declination of the compass needle at any place along a red line is the declination given on that red line. As other places the declination is between those given on the neighbouring red lines; thus at the place marked A, the declination is between N. 30°30' E. and N. 31° E. The easterly declinations of the compass needle are decreasing 4 minutes annually.

Surveyed, compiled, drawn and printed by the ARMY SURVEY ESTABLISHMENT R.C.E., 1950-54
Aerial photography by the R.C.A.F. 1949.
Area in Alaska from the Taku River map of the United States Geological Survey, U.S.A.

Universal Transverse Mercator Projection

REFERENCE

Road, Hard Surface, All Weather	More than 2 Lanes — Route No. — 2 Lanes
" Loose Surface, All Weather	2 Lanes Wide or More
