

Silverton, B. C.

STANDARD

February 29, 1948.

DEVELOPMENT RECOMMENDED

- "A" - To be done as soon as possible.
 "B" - To be done later.
 "C" - To be done last.

LEVEL 6Distance620

- "C" Continue main drift East on vein a minimum of 40', or more if vein opens up. 40'
 "A" Drift East on vein in "cut off" x-cut to fault 30'
 "A" Raise on vein from at or near 620 x-cut 25'
 "B" Continue main 620 Raise as far as ore extends 50' ?

619

- "C" Later, prospect Eastward along old drift, from present face. 60'

633 Region

- "A" Drift West on ore (Elev. 1473) as far as it extends ?
 "A" Drift West 10' in 631 to open ore at Co-ord. (1180 N - 1150 E.) Elev. 1456, 10'
 And raise to ore at Elev. 1473 if then advisable 35'
 "A" Raise from Drift at Elev. 1473 as far as ore extends ?
 "B" Work upward in H.W. of old Steps later as developments indicate, perhaps through drift and raise (1260 N. - 1145 E.) at El. 1467 ?

640

- "A" Continue drift E. on vein across old Raise as far as ore extends ?
 "A" Continue raising (and stoping) all along back where in ore. ?
 "C" Explore vein-split floors 4, 5, & 6 at Co-ord. 1400 N. by slashing, and if results favorable x-cut for it on sill. ?

640 - 660 Fault Zone

- "B" Drift southerly in F.W. of fault from 640 x-cut in Quartz and Zinc (?), as per D.D. Hole #138 30'

650

- "B" Continue Raise near end W. Drift to 501 Sill 30'
 "C" Continue W. Drift or if runs out of ore x-cut to Right 35' ?
 "A" In Riasé 20' E. of main x-cut slash 10' S.E. at top to ore in D.H. and follow upward 50'

624

- "B" Raise along E. end of old 624 Steps, on ore 40'

601 Inter. at Elev. 1494

- "B" Continue Drift from (1525 N - 1445 E.) face to ore in D.D. Hole #11 (13% Zinc sludge) at Elev. 1506. Driving S 85° W. 75'

LEVEL 5.

- "A" Prospect area from 5 Level "I" vein to "A" intermediate and 525 Intermediate through present workings. 0
 "C" Break into "A" intermediate from old Raise at (1215 N. - 1440 E.) through new Raise about 15 ft. 15'
then

520 Raise

- "B" Re-open old drift W. on old Intermediate and watch for vein turning off to Right. 50'

10' E. of 503 Raise

- "B" X-cut to ore in H.W. (10 ft.) and raise on it. ?

506 Raise - "I" Vein or Spur

- "A" Continue about 15 ft. to ore in drill hole and if OK continue Raise. 50' ?

STANDARD

DEVELOPMENT RECOMMENDED

February 29, 1948.

LEVEL 5 (Cont'd)

505 Stope

"B" Raise from 5 Level at 70 ft. West of 505 Raise (prospecting and ore pass) (Vertical through F.W. gouge then up along it) 70'

503

"B" Open area over 503 Raise from East end 501 9th floor or present Raise in x-cut from (Preliminary work, mostly timbering)

No development planned on #3 and #4 Levels for present.

Compiled with the assistance and approval of R. T. Avison.
