October 4, 1956

Mr. A. W. Han, Mgr
Western Exploration Co., Ltd
Silverton, BC

Dear Art:

Enclosed are two folders of small photo-copy machines, the Remington-Rand "Transcopy Duplex" and the American Photocopy Equipment Co. machine which arrived by mail today. Also the Remington Rand fire-proof file cabinet.

I had tried to get a line on the copying machine on which I had a description a couple of years ago without any success, although one of the above may be the same thing.

So far as I know no company here will make photo copies except the usual photostats which, as I recall, are around 75¢ to \$1.00 a page.

Whether you would consider the cost of the machine worth while to preserve survey, drill-hole and what have you records from destruction by fire. I do not know nor did I get the cost of the special paper used with the above machines.

I have heard nothing of Mr. Hill's report on the Western Exploration Company and hesitate to call Mr. Chilcott. Do you know anything of it?

How is the drilling coming on?

Rose arrived September 15th. and we now are settled in an apartment (Suite 303) at 1393 Robson Street.

We both send regards to Elsie and yourself.

Sincerely
