
Legend

Quartz Vein:	> 60% white quartz
Quartz Stockwork:	silicified host rocks with 10 to 60% white quartz (carbonate) veining in irregular, anastomosing, sheeted and/or regular net veining patterns
Quartz Breccia:	brecciated (mechanical and/or mossaic, stockwork breccia) quartz vein or quartz vein injected host rocks
Silicified Zone:	weak to pervasive silicification, seritization +/- pyritization of host rocks with only minor quartz veining. Various degrees of these alteration types
T **Tuff:**	various andesite tuffs
S **Sediments:**	argillites, arkoses, pebble conglomerate, etc.
Ad **Andesite Dyke**	
Sy **Syenite**	
P **Porphyry:**	various prophyry flows and dikes
