Glacier + Snowfield

Silt Samples ← Serial No. 1032 Grade c+ Assay ( )

Grades a - g represent visual grading of Rubeanic Acid reaction spots from a just detectable value to the maximum for the area.

Lab. assays in p.p.m. Cu given thus (220) for some samples.

Grades below b - Uncircled
Grades b - d - Single Circles
Grades above d - Double Circles

Grades < c 0 - 150 p.p.m Cu
Grades c - e 150 - 550 p.p.m Cu
Grades e - g 550 - 1100 p.p.m Cu.
