LEGEND

- PHYSIOGRAPHY**
 - Road
 - Pit
 - Contour in feet, interval 10 ft.
- STRUCTURAL INFORMATION**
 - Layering or foliation
 - Fracture zone or alteration zone or fault
 - Creulation lineation
 - Lithologic contacts estimated projected
- DRILL INFORMATION AND SAMPLE LINES**
 - * P1-2 Proposed pierce point for drill hole 1 to base skarn 2
 - Chip sample line
 - PCH Percussion drill hole
 - DCH Diamond drill hole
 - Proposed drill site
- SURVEY INFORMATION**
 - Survey station with spot elevation
- NOTE:** Elevation of station 1 arbitrarily set to 3732 feet back sighted survey loop. Closure errors indicated at station 14 of map.
- ROCK TYPES**
 - Calc Silicate or Skarn
 - SKARN VARIETIES:
 - c - coarse grained, m - medium to fine grained, b - banded,
 - C - Calcite, W - Wollastonite, G - Garnet, I - Idocrase,
 - D - Diopside, Q - Quartz, Gl - Glauconite
 - C.S. - undifferentiated Calc Silicate
 - B1 Reference number for Skarn bands 1 to 5
 - Albite
 - Biotite Quartz Monzonite
 - Biotite Schist
 - Biotite Quartzite
 - Pegmatite or Pegmatite + Schist (P/S)

000184
