TROUDOR RESOURCES INC.

82M/13E (082M 136)

RECEIVER ACCEPTS OFFER - Steven D. Case, a director of Troudor Resources Inc. announces that
FOR TUNGSTEN MINE their offer to buy 100% interest in the tungsten mine, mill, etc.,
site at Silence Lake, 32 km NE of Clearwater, B.C., formerly oper-
ated by Dimac Resources Corp., has been accepted by Dimac's receiver, Price Waterhouse Ltd.

The mine was placed in production in October 1981 by Dimac at a cost of \$2,700,000.
Dimac processed about 20,000 tons of ore grading 1.2% W_{65} by November 1982 when they were
forced into receivership by the Royal Bank of Canada which holds a first mortgage debenture
for \$2,200,000 in Dimac's assets. The price offered has not been published.

Mr. Case says the 110 tons per day mill is winterized. Start-up cost is expected to
be minimal.

Ore reserves now indicated are: 1,500 tons of 1.5% W_{65} stockpiled at mill site; 5,000
tons of 1.2%, open-pit; 10,000 tons of 1.2%, underground; 20,000 tons of 0.3%, tailings.
Considerable potential exists to increase these reserves.
