

Magnetite type breccia
sch of the in this approx.
area.

Payson says
the contact is believed
to be EP breccia
IP-type Bx (EP) seems
to have a cherty and the
fract. dev. is contrasting EP contact.
(JMC)

(IP box?)
replant w/ leopards
L. w. = piddler
(F. of d. but partly
on fold down)

cpble in
Bx (IP box) w/ EP type
- Spec. n.

alt (hard
chert bio)

? EP?
(no long
pl. -)
