CRAIG
LEGEND
Strike and dip of contact, vein or bedding
Strike and dip of schistosity
Prominent fracture cleavage
Fault
Geological contact, assumed
Base station, station
Surface diamond drill hole collar and horizontal projection
Claim boundary
Portal with underground workings
Shaft, inclined
Old trench or pit
Old wagon road
Trail
NOTE Coordinates approximate
Drift, Talus, rock debris, etc
Brecciated Rhyolite cemented with qtz, mineralized with Ga, Sp, Py and Tz
Quartz vein or lenses - barren, altered
Quartz vein mineralized with Ga and Sp
Quartz, diorite, diorite lamprophyre dyke
Rhyolite intrusive stock - texture from fine grain hypabyssal - aphanitic - more altered in vicinity of main vein zones - outline was irregular - many angular inclusions in margin of stock may alite, dykes, apophyses off main body
Volcanics - undifferentiated include dacite, rhyolite, and related tuffs and breccias, minor argillite
Conglomerate - small pebble small lenses in argillites
Argillite banded
Pale quartzitic argillite and argillite - intensely foliated
Black argillite schist - in part very graphitic - closely foliated
