mber of the Hughes-	١,				~~~~~

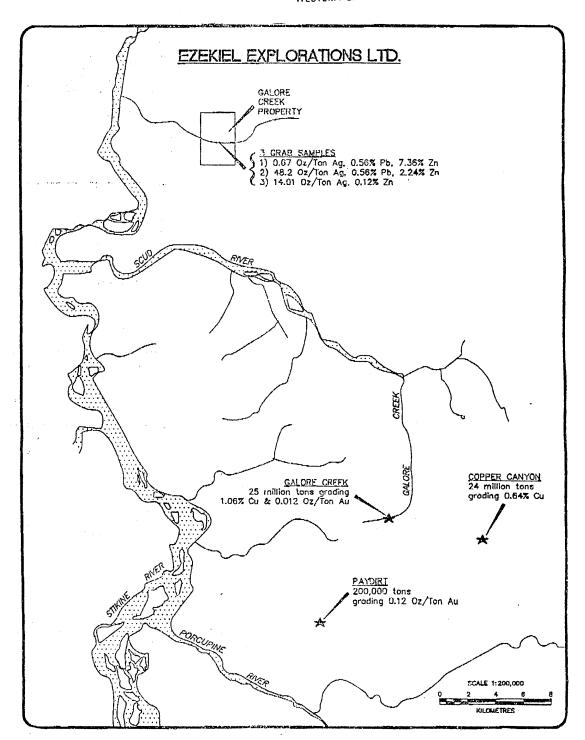

Lang group of companies, has signed an agreement with Cascade Investments Joint Venture to acquire a 100% interest in certain mineral claims, subject to a 2% net smelter return royalty, located at the northern tip of the Galore Creek camp 150 miles NW of Stewart, B.C. SEE MAP OVERLEAF PAGE 1 Ezekiel must pay \$60,000, issue 200,000 shares and spend \$600,000 on exploration over three years. A finder's fee of 25,000 shares will be paid to LO.O.M. Western Securities Ltd.

The property is underlain by a complex sequence of volcanic and sedimentary rocks overlying late Paleozoic schists and gneisses, which has been intruded and surrounded by Coast Range intrusives. Recent activity has indicated base and precious metal mineralization is related to the intrusives. Earlier prospecting returned three grab samples; see table above.

Ezekiel is planning an exploration program to begin in two months that will include a detailed, low-level airborne survey to be followed by geological mapping, geochemical and more geophysical surveys. (SEE GCNL No.4, 5Jan90, P.1 FOR OTHER EZEKIEL PROJECT NEWS)
