

GALORE CREEK GOLD CAMP

JACK CLAIM

Harrisburg-Dayton Resource Corp. has recently acquired a strategic ground position in the emerging Galore Creek Gold Camp. The Jack claim located approximately 12 km southwest of the large Galore Creek porphyry copper-gold deposit, was optioned from Consolidated Silver Standard Mines Ltd. of Vancouver. The terms of the agreement allow Harrisburg-Dayton to acquire a 75% interest in the property by spending \$750,000 and making cash payments totalling \$35,500 over a 5 year period.

The geology of the Jack claim can favourably be compared to the Delaware and Skyline gold deposits located 50 km to the south on the Iskut River. The property is underlain by Upper Triassic volcanics and sediments which appear to have been altered by the syenite intrusives in the area. These intrusives are an important key to the gold-silver deposits in the Stewart, Sulphurets, Iskut and now the Galore Creek Gold Camps. Samples taken from the Jack claim have yielded high grade gold values up to 1.509 oz/ton.

Major gold discoveries made last summer by Continental Gold, Sarabat Mining Corporation and Bellex Mining Corp. have drawn several major mining companies into this new gold camp. Homestake, Cominco, Equity Silver and International Corona have recently staked large ground positions in close proximity to the Jack claim. A recent major acquisition by Murray Pezim controlled Consolidated Goldwest has brought notoriety to the area which is shaping up to be a world class gold belt.
