**RE: DIRECTOR 5 082ENE018**

This occurrence has been combined with the MORNING showing (082ENE022) because the location is vague, there are no records of exploration or mineralization at this site when it was supposedly in production, the production probably came from the MORNING dump and in any case the production is recorded by BC METAL as production from the WATERLOO (082ENE017) mine. It is recommended that DIRECTOR 5 be deleted.
