URANIUM DRILLING PROGRAM UNDERWAY - Tyee Lake Resources Ltd. has reported that the drilling program being carried out by Placer Development Ltd. on Tyee's Hydraulic Lake uranium deposit southeast of Kelowna, B.C., is proceeding satisfactorily.

Core examination and probing of the first two holes is reported by Placer to confirm the continuity of higher grade material within the previously drilled area.

To prevent oxidation of the HQ sized drill core, 2½ inches in diameter, it is being sealed and frozen prior to shipment to the laboratory where it will undergo extensive metallurgical testing.

The start of the current drilling program was witnessed by representatives of various departments of the provincial government who expressed satisfaction with the manner in which the operation was being conducted.

## Good results first two holes Tyee U property

VANCOUVER - Tyee Lake Resources reports that drilling being conducted by Placer Development on Tyee's Hydraulic Lake uranium property, southeast of Kelowna, B.C., is proceeding satisfactorily.

Core examination and probing of the first two holes is reported by Placer to confirm the continuity of higher grade material within the previously drilled area.

To prevent oxidation, the core is being sealed and frozen prior to shipment to the laboratory, where it will undergo extensive metallurgical testing.

Provincial government representatives who watched the start of the current drilling program expressed satisfaction with the manner in which the operation was being conducted.
