

# AMAZON MINE

NOTE: "Rake" of the ore is indicated by old stope

**EN ECHELON TENSION VEINS**  
(Down Dip and to the West)

**DOLOMITIZED AREA**  
(Probably accounting for the veins)

Note: Calcite vug -70°E indicates "rake" of ore

Scale 1:480

Mag Dec: 21° E

(LAT: 49°46.5' LONG: 116°54.5')

GEOLOGY BY: GEORGE G. ADDIE PENG  
MAY 20, 1983

**MARBLE BEDS SEPARATED BY BIOTITE AND MUSCOVITE SCHISTS**

WOODBURY CREEK

**SURVEY NOTES:** The original survey to Sta. III was by "W.M.S" ref. Dept of Mines xerox map 60016, July 20, 1953  
New stations were by a "chain and compass" type survey assisted by Mr. David May (owner). This survey was not "closed".

**LAMPROPHYRE DIKE**  
(Camptonite? amygules filled with calcite)

Note: The vein cuts the dike
