KASLO AREA CLAIMS

During May 1966, I examined a Silver-Lead-Zinc showing in the Kaslo Mining District on behalf of F H P Explorations Ltd.

There are 12 claims in the block known as:

<u>Claim Name</u>	<u>Claim Number</u>
Norm 1 to 4 incl.	8638 to 8641 incl.
Norm 5 to 12 incl.	8666 to 8673 incl.

The main showing is on the claim known as Norm No. 4.

The claims can be reached by road and car ferry and lie a distance of 22 miles from Nelson, British Columbia.

Generally speaking the mineralized occurrence appears to be a replacement lens in a limestone formation. A trench and semi-adit have been sunk on the showing and reveal a highly mineralized lead-zinc body ranging up to six feet in width and occurring over a depth of about three feet in the adit face with well developed calcite above and below the mineralization.

The lens strikes north 30 degrees east and has a dip of 42 degrees westerly. It occurs in a strongly developed limestone formation and could not be successfully traced in either strike direction.

It is more than likely that the occurrence is a lens or a pod which has resulted from local concentration of mineral solutions. It is, however, impossible to ascertain on the present showing how much continuity the body may have along the dip.

Assays taken over an 18" width in the hanging wall returned the following values:

Silver	31.3	ounces to the ton
Lead	38.65	percent
Zinc	24.13	percent

while the adjoining 4 1/2' showed:

Silver	22.4	ounces to the ton
Lead	25.65	percent
Zinc	20.98	percent

the latter sample being in a heavy gossan zone.

It would be advisable to carry our further investigation on this showing. Extension of the adit and the sinking of a pit down the dip would soon reveal the extent of the mineralization. A sum not exceeding \$2,000 would be justified to either establish or discredit the zone. Recovery of ore could feasibly pay for the operation.

NORM

CERTIFICATE

I, F. L. Croteau, of 540 Burrard Street, Vancouver, in the Province of British Columbia, certify that:

1. I am a graduate of the University of Saskatchewan and hold the degree of B. Sc. in Mining Geology. Year of graduation was 1936.
2. I have practised my profession throughout Canada since 1936.
3. I am a registered Professional Engineer in the Province of British Columbia.
4. I have no personal interest, direct or indirect in the properties examined or in F H P Explorations Ltd.
5. The findings in this report are the result of personal examination of the property, discussions with the original staker and prospector and from information obtained from government publications.

F. L. Croteau,
B.Sc., P. Eng., P. Geol.

There is no equipment on the Cousin Jack Property at this time.

Details respecting the Cousin Jack Property, the means of access thereto, the character, extent and condition of underground and surface exploration work done and improvements made thereon and the history of the said Property are contained in and reference is hereby made to the Engineering Report dated 20 September 1966, of J. A. Millican, P. Eng., of Grand Forks, B. C., which report forms part hereof.

Since the date of Mr. Millican's report the Company has caused a geochemical survey to be done on the property.

(i) (c) KASLO SILVER--LEAD--ZINC PROPERTY

The Company owns 12 recorded mineral claims located 22 miles from Nelson, B. C. in the Kaslo Mining Division. These Properties are more specifically described as follows:

MINERAL CLAIMS

<u>Name of Claim</u>	<u>Record Number</u>
Norm 1 - 4 incl.	8638 - 8641 incl.
Norm 5 - 12 incl.	8666 - 8673 incl.

Access to the Property is by means of ~~the~~ old Trans-Canada Highway east from Nelson for 18 miles to the town of Balfour, by ferry from Balfour to Crawford Bay and from Crawford Bay by gravel road for approximately 4 miles.

There has been no underground or surface work done on the Property nor to the knowledge of the signatories hereto has it been examined previously. As of the date of this Prospectus, no work has been done by the Company on this Property nor is there any equipment thereon.

Further details respecting the Kaslo Property are contained in and reference is hereby made to the Engineering Report dated May 1966 of F. L. Croteau, P. Eng. of Vancouver, B. C. which report forms part hereof.

- (m) (ii) The Company acquired all the mineral properties described in paragraph (m) (i) above from Harold Chivers, Norbert Jacoby, Francis W. Lees and James J. McMahon for the total consideration of 525,000 fully paid and non-assessable shares of the Company, the beneficial ownership of which was distributed as follows:

In the Report of J. A. Millican, P. Eng., dated 20 August 1966, referred to below there is reference to Mineral Claims Euphrates 2 and 3. At the time of Mr. Millican's Report, there was some confusion as to the name of the Claims, and the Euphrates Claims are actually Mineral Claims J No. 25 and 26. Mr. Millican also refers to Mineral Claim J No. 21. This Claim was disallowed subsequent to the writing of Mr. Millican's Report but none of the work recommended by Mr. Millican was to be carried out on this Claim.

Details respecting the Golden Age Property, the means of access thereto, the character, extent and condition of underground and surface exploration work done and improvements made thereon and the history of the said Property are contained in and reference is hereby made to the Engineering Report dated 20 August 1966, of J. A. Millican P. Eng. of Grand Forks, B. C., which Report forms part hereof.

On the Golden Age Property there are storage sheds and miscellaneous prospecting equipment.

(i) (b) COUSIN JACK LEAD/GOLD--SILVER PROPERTY

The Company owns 28 recorded mineral claims and two mineral leases located near Otter Lake in the vicinity of Tulameen, B. C. in the Similkameen Mining Division. These properties are more specifically described as follows:

MINERAL CLAIMS

<u>Name of Claim</u>	<u>Record Number</u>
Allan No. 1 - 28 incl.	16382 - 16409 incl.

MINERAL LEASES

<u>Lease Number</u>	<u>Lot Name</u>	<u>Lot Number</u>
52	Ymir	264
52	Morning	265
52	Oshkosh	266
52	Winibago	267
52	Black Bird	268
52	Berlin Fraction	269
52	Anaconda	373
53	Freddie Burn	270
