GOLDEN DAWN EXPLORATIONS LTD. (GDE-V)

82F/9E B2FNE060

HEDLEY PROGRAM PLANNED - Golden Dawn Explorations Ltd. has reported Larry Sookchoff, P.Eng., has prepared a geological evaluation of the Leader claim group, Fort Steele, B.C., where six short diamond drill holes together with bulldozer stripping and trenching work has recently been completed. He said the Leader vein appears to be associated with a prominent regional structure that may host in addition to the known 600 meter gold bearing zone, comparable, or parallel mineralized quartz veins. He recommends \$150,000 exploration in three phases which is planned to be carried out in 1986. Donnex Resources Inc. is a 50% owner of the Leader vein group and managing partner of this project. Golden Dawn Resources also hold claims in the Hedley, B.C. area where bulldozer trenching is planned to start by the end of Sept. (See map overleaf P.1, #174 Sept. 10, 1985).
