Chas. C. Starr Esq.,  
Mining Engineer & Geologist,  
c/o Western Exploration Co. Ltd.,  
Silverton, B.C.

Dear Mr. Starr:

Acknowledging receipt of yours of the 11th inst, with accompanying plan of No. 7 level and stopes at the Bosun Mine for which I thank you.

I note your remarks in connection with ore occurrences as shown on your sketch in the vicinity of "A", also, that a small ore pass is now being driven from #7 level to a point a few feet west of the area above mentioned, and that the top of the raise is approximately below where a toe of ore was mined along the bottom of #6 level some time ago, also that the prospects for ore between the top of the raise and #6 level look good.

With regards to the small stope over the shaft of #7 level. Like yourself, I feel that Mr. Peck would be justified in OKing the further use of the shaft, as I am of the opinion that it is perfectly safe. My confidence in Mr. Postlethwaite, knowing that he would take every precaution for the safety of those working under him is unshaken. Nowever, now that I have your report, I will instruct Mr. Postlethwaite to place three or four sets of disk pillars under the portion referred to in order to be on the safe side, and will so advise Mr. Peck when passing through Nelson in the very near future.

Glad to hear that you are getting better and your strength is returning and with the hope that you will suffer no further trouble or complications and kindest regards.

Sincerely,

R. CROWE-SWORDS

RCS:ocs

P.S. Please convey my best wishes to Mr. Ham.
