September 16, 1946.

Mr. C. C. Starr,
Box 514,
Vancouver, B. C.

Dear Charlie:

The U. S. S. R. & M. Co. Salt Lake City have given us the following assay on Bosun zinc milling ore as determined by Anaconda Copper at Great Falls, Montana.

Cu.	Pb.	Zn.	Insol.	Fe.	Cd.	As.	Sb.	Sn.
.46	.7	53.2	5.6	5.3	.35	.03	.14	.3

The latter three elements in quantities determined are objected to. 0.3 Sn seems a very high tin content. Possibly they have a tin mine.

Sincerely,

Art.

(A. M. Ham)
