Silverton. B.C.

Mr. Hartney Mine

Dear Mr. Starr.

Yesterday I drove up to the Hartney,  
and noted surface improvements, as well as  
timber already cut, sufficient for all Bowen  
requirements.

Before returning to Vancouver, please  
obtain the services of a man or two, to  
clean off the floor of the tunnel which was  
reported to have considerable ore in the floor, and  
see if this can be substantiated.

Yesterday, I was speaking to Joe  
Depreth, who stated that he noticed some  
give ore in a shaft in (I think) to 2 level.

A few samples would be appreciated  
along with a sketch showing position of ore  
shots (if any). I am arranging to have  
both nos 2 & 3 levels surveyed, should same be  
warranted, as I am of the opinion that nos 2  
and 3 are not in line with one another.

Sincerely

George Sevard  
for Santiago Mines Ltd.

over

Dr. Rosum.

001808

As soon as it is practicable, kindly get a few samples of the zinc 'showings' on No 7 level, at points where you made your observations on Friday. May I suggest, that, you ask Mr. Haen, whether it would be possible to obtain the results of the analysis made in which the presence of tin was found in the ores of the "Rosum" whether in the lead or zinc and percentages of same.

Kindly convey my kindest regards to Mr. Haen. Best wishes.

Sincerely  
W.S.
