

ORO F110

082 F NW 122

P 1987-5 pp 37 Prod of zones of relatively
 Au enriched Ag-Pb-Zn ore on surface
 vein in \approx 30 cm wide striking 030/65SE dip.
 E striking cross-faults truncate the vein at
 its southern end. matrix includes py, Zn,
 PbS. High Au values, prominent vein S
 assoc. with a precious metal bearing
 argillite also zone make this an effective
 exploration target.
