

Location of L. T. Group of Mineral Claims is about 2 1/2 miles northeast of Ottawa Mine on the north side of Springer Creek in Slocan City Mining Division of West Kootenay.

Formation is granite intersected by diorite dykes.

Several veins are known to exist on the property but the work done has been mostly confined to what we call the middle vein.

The strike of this vein is about due Northeast and Southwest with a dip of from 50 degrees to 70 degrees to the Southeast.

The dykes have about the same strike with a dip to the Northwest of about 45 degrees.

Ore was first opened up in the #2 drift - (now caved) and the ore shipped has come mostly from the #3 drift - driven later to prospect the discovery made in the drift above. This ore has not been opened up as yet by the #4 drift, but I am strongly of the opinion that it will be found there, and with very little work.

Elevation: 6500 feet; heavy winter snow, but no snow-slides.

Truck road from Slocan City (9 miles).

RECORD OF SHIPMENTS L.T. MINE SLOCAN CITY, B.C.
