Samples no 2 and 4 are channel samples across 12 to 14 ft. Samples 1 and 3 were taken across the same section but started to bring up the grade. The oxidized zone at the point where the samples were taken is 75 ft wide. An open cut 200 yds along the strike of the oxidized zone contains a good grade of calimine ore.

Dear Mr Enderby

I understand from Dr. Sargent that we are to work together in the same Pendland county this summer. I am sorry I was not able to begin work earlier but am making arrangements to leave Vancouver Monday June 18 and hope to be in Fruitvale ~~at the~~ on the apt on evening of June 20. I hope it will be convenient to meet you at Fruitvale on June 20 or early June 21.

My Vancouver address will be
1033 E 39th St if this is wrong
