Started	Bearing	Lat.	Collar El.	Logged by	Date <i>Sept 29-65</i>
Completed	Angle from Horiz.	Dep.	Bottom El.	Remarks	
Driller	Length	Location	Level		

Footage		Interval	RECOVERY		Graphic Log	DESCRIPTION	Sample No.	From - To	Interval	ASSAY			
From	To		Fr.	%									
99	102					21	99-104						
102	103.5					Arg. Banded - Pyrrhotite Pulaskite P dike	22	104-109					
103 1/2	109					Argillite - Fractured and Banded with chert - Bedding ±60°							
109	114					23 22	109-114						
114	119					Argillite + cherts - tiny dyke at 114 - crossing beds. + pyrrho Argillite - silicified with stockwork veinlets of Qtz & calcite Bedding 60° - Pyrrho, Arseno?	24	114-119					
119	124					25	119-124						
124	126					Argillite - dense & black - little sulphide - Bedding 72° ± Brecciated Arg with streaks of pyrr. chalc - silicified.	26	124-126					
126	131					Dike - white spotted volcanic flow. Cherty - silicified - Argillite - calcite	27	126- ¹³¹ 132					
131	134					28	131-134						
134	135.5					Argillite - striped with silica & calcite Breccia - cherty braccia arseno, chalc fragmented dike	29	134-135 1/2					
135 1/2	140					Dike - Diorite lamp dike - little alteration.	30	135 1/2 - 140					
140	145					31	140-145						
145	150					Chert - laminated - purple and green - chert (chalc, Arseno) (chert on scarn) Pyrrho, Moly Biotized Chert - Scarn - Pulaskite Breccia - Arseno, Pyrrho, Chalc	149 32	145-150
