**International Sinabar Industries** ISB  
Shares issued: 2,897,531 Aug 18 close: \$0.20

**News Release . . . 480,000 shares to be placed at \$0.15**

Mr Manjit Beryar reports:

The company has reached an agreement with certain placees for the private placement of 480,000 shares of the company at \$0.15 per share.

The private placement is subject to regulatory approval.

Funds raised from the private placement will be used for general corporate purposes.

**International Werner Technologies** IWI  
Shares issued: 2,360,395 Aug 18 close: \$0.19  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for annual financials dated February 1989.

**Interstrat Resources Inc** ITE  
Shares issued: 10,163,575 Aug 11 close: \$0.04  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for interim financials dated March 1989.

**Cease Trade Company**

A section 146 cease trading order has been issued against the company on August 17 1989 for failure to file an interim financial statement for the period ended March 31 1989 and a quarterly report for the period ended March 31 1989.

Members are prohibited from trading in the securities of the company during the period of suspension or until further notice.

**Island Mining & Explorations Co Ltd** IMX  
Shares issued: 6,598,917 Aug 18 close: \$0.18

**News Release . . . Director and president appointed; director and president resigns**

Mr Eric Bergvinson reports:

At the company's annual general meeting held August 16 1989, Mr Eric Bergvinson was elected to the board of directors and appointed president of the company.

Mr Ernie Bergvinson has resigned as president and declined to stand for election to the board of directors.

**Izone International Ltd** IZN  
Shares issued: 13,638,692 Aug 18 close: \$0.37  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for annual financials dated February 1989.

**Jeffen Capital Corporation** JEF  
Shares issued: 1,990,316 Aug 16 close: \$0.10  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for interim financials dated March 1989.

Shares issued: 2,321,550 Aug 18 close: \$0.35  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for annual financials dated February 1989.

**Kappa Resource Corporation** KPC  
Shares issued: 2,195,080 Aug 18 close: \$0.25  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for interim financials dated May 1989.

**Kenar Resources Ltd** KNA  
Shares issued: 3,374,059 Aug 11 close: \$0.20

ROSSLAND

**News Release . . . Negotiations concluding for 50% interest in BC mineral claims**

Mr Douglas Edgar reports:

Further to the company's news release in the Stockwatch dated August 17 1989, the company will conclude negotiations to acquire an undivided 50% interest in seven crown granted mineral claims known as Midnight, OK, OK Fraction, Golden Butterfly, Golden Butterfly Fraction, June and Little Dalles, situated on the

east slope of OK Mountain, approximately two miles west of Rossland, BC within 30 days.

In the past the Midnight claim produced a total of 5240 tons of shipped ore producing 7749 oz Au and 4719 oz Ag and minor amounts of copper, lead, zinc and cadmium. This works out to an average grade of 1.48 oz/ton Au and 0.91 oz/ton Ag. In the past the OK claim total material shipped amounted to 320 tons to produce 560 oz Au and 481 oz Ag. This constitutes an average grade of 1.8 oz/ton Au and 1.5 oz/ton Ag.

The Baker vein, as defined in the lower level workings, has received the most attention in recent years. Random chip sampling of exposed portions of this vein system returned gold assays of 9.034 oz/ton and 4.134 oz/ton.

Most of the rock vein material mined to date has been from andesite country rock. Gold mineralization is also reported associated with nickel values from the serpentinite rock unit. Values of 0.1 to 0.2 oz/ton Au have been indicated over 50 ft widths in the serpentinite.

The serpentinite zone has been the subject of only limited investigations. On the Midnight and OK properties a length of 1600 ft and average width of 90 to 200 ft is suggested. A drift from the main adit cut 90 ft of serpentinite. In this unit there appears to be a 50 ft wide mineralized zone that was drifted on for 50 ft. Although some extremely high assays were reported, values of 0.1 to 0.2 oz/ton Au have been indicated over 50 ft widths and values of 0.5 oz/ton Au can be calculated over 15 ft widths in the same zone.

The outlining of substantial tonnages of gold bearing serpentinite combined with defining the high grade gold quartz system could provide sufficient blended millfeed for operating at increased capacity for a number of years.

Only a small portion of these claims have received systematic development and mining to date. Some mineralized zones are visible at both surface and in the underground workings. While continued exploration and drilling are recommended, these surface and sub-surface zones extend substantially into the mineral claims and are ready to be mined for production purposes.

**Laker Resources Ltd** LAK  
Shares issued: 1,646,833 Jul 27 close: \$0.40  
**Delinquent Filer**

The superintendent of brokers advises that the company is delinquent for interim financials dated May 1989.
