  5. Nov. 30 - Section A-A' through adit & pit of 01 (same as 4) 1" = 10'
  6. Dec. 1 - " B-B' " " , X-cut, & pit of 09 1" = 10'
  7. " 1 - " C-C' " " and pit of 08-022 1" = 10'
  8. " 2 - Coloured geological plan of adit, incorporating data of 1 and 4, revised plan <sup>base</sup> of adit by Foreman, Sept. 30th, and memory of place where cut sample Sept. 30th. 1" = 20'

Survey.

E. Foreman set an iron stake beside his office tent, on the corner of the two original roads, as intersection of co-ordinates 10,000 N and 5000 E. He set another stake at the end of the upper road to represent assumed elevation 4650'. This approximate elevation was taken from the writer's 1000' base map. Foreman then determined astronomic north, and ran a closed traverse from the tent camp up the slide, across, down over the lower pits to the present 4550 portal and across to camp. He took numerous side shots to establish contours below 4700'. As the adit progressed it was periodically surveyed.

The plan table survey by the writer, at 1" = 40', adjoining ~~that~~ the upper edge of Foreman's, does not anywhere approach the adit.
