

Small shear flips over
to 85° N of N stp, but w coal
clms to dip 85° E

29' up rse to floor of dr
5' up rse to 5' under surf
30' up shaft making alt
70' total up for 100'

shearing horsetails into NW

81k pretty phyl.

92 carb. remai

1' py-qz vein
along fw

py vein
swings into FW &
does not reappear
at intersec with X-vein

winze on X-vein

Up in stp at least
60% of the wall's shear is
chert-up rock; rest is pocket
& lenses of vein qz. sph. &
gal. are restricted to uncommon
lean dissems in qz carb. rarely
in fault mat. & one lens of
massive sph. abt 4' long,
5" th. right w wall shear;
this lens ctns also a fair bit
of py & chalco. - sp. 21
