 News Release

SW.
 Goldfever Resources Ltd. announces the assay results taken from the Yuill Towser tunnel on July 22, 1987.

The following is the analysis of Geological Samples assayed by Quanta Trace Laboratories of Burnaby, B.C.

			lbs/ton
Bismuth	16,300 PPM	1.63%	32.6
Cobalt	15,700	1.57%	31.4
Lead	67,700	6.77%	135.4
Zinc	2,900	2.19%	43.8

PRECIOUS METALS BY FIRE ASSAYS

Silver	35.3	oz/ton
Gold	0.307	oz/ton
Palladium	0.0008	oz/ton
Platinum	0.011	oz/ton
Phodium	0.002	oz/ton

Results in oz/ton (120,000 ton of similar material in stockpile on site.)

The Yuill Towser Group of claims is located near Trout Lake, 50 miles southeast of Revelstoke B.C. and is on the same mineral Belt as the properties owned by Windflower Mining Ltd. Our property is southeast from the point where Graenges International Mines and Windflower Mining Ltd., a joint venture, has excellent drilling results, reported just recently.

 Mr. Aljosa Ivancic reports:

The company announces the findings of sampling taken place June 17th, 1987 at the Yuill Towser Tunnel 3' x 80' vein.

The tonnage available in the shoot is about 120,000 tons. Similar grade was assayed by SGS General Laboratories with the following results:

SAMPLE NO.	GOLD OZ/ST	SILVER OZ/ST	LEAD %	ZINC %
1 from both sides of 2 ft vein	0.168	30.75	7.33	1.90
2 from galena	0.214	32.24	9.29	2.64
3 from center of vein	0.192	30.28	7.68	2.76
4 from cross section (3 ft vein)	0.194	27.33	7.82	1.98

The results from platinum, paladium and iranium will be available in a few days.

Production start up is scheduled for the beginning of July 1987, with, presently, no delays in the forecast. The shipping of equipment to the site will occur in the week of June 29th, 1987.

The Yuill Towser group of claims is located near Trout Lake, 50 miles southeast from Revelstoke, B.C. and on the same mineral belt as the properties owned by Windflower Mining Limited. Mr. Aljosa Ivancic reports:

The company announces the findings of sampling taken place June 17th, 1987 at the Yuill Towser tunnel 3' x 80' vein. The tonnage available in the shoot is about 120,000 tons. The average grade on a 3 foot cross section vein is as follows:

IR OZ/ST	PT OZ/ST	PD OZ/ST	AU OZ/ST	AG OZ/ST	PB %	ZN %
.25	.128	.29	.194	27.33	7.82	1.98
\$350	\$64	\$32	\$85	\$202	\$62	\$24

Estimated ore price per ton before concentrate: US\$820.50.

Mining cost per ton:	US\$ 66.00
Milling cost per ton:	US\$ 28.00
20% smelting cost per ton:	US\$158.10
Total production cost per ton:	US\$258.10
Total profit per ton:	US\$562.40

Production start up is on schedule for July.
