

LEGEND

- PERRYLODE FORMATION: black carbonaceous, recrystallized, cherty sediment
- 23 CHERT: recrystallized chert grey to blue-grey
- 22 DOLOMITE: grey to dark grey, fine grained, structurally banded
- 21 MICACEOUS LIMESTONE: medium to coarse grained
- 20 DOLOMITE: white to blue-grey, structurally banded
- 19 LIMESTONE: white, medium grained
- 18 GREEN SCHIST: muscovite-quartz schist, some garnet and feldspar
- LIMESTONE: grey to white, blue-grey, DOLOMITE at No. 2 Shewing
- 76 QUARTZITE: brown, micaceous, calcareous

SYMBOLS

- Geological boundary (defined, approximate, assumed)
- Bedding
- Schistosity, cleavage
- Linedip
- Dragfold
- Fault (defined, approximate, assumed)
- Joints (inclined, vertical)
- Underground openings
- underground surface
