Sicamous

September 24th, 1929.

H. G. Nichols, Esq.,  
Resident Engineer,  
Kamloops, B. C.

Dear Sir:

82L/15W

With reference to your letter of August 30th and sample of graphitic schist from near Sicamous, I would inform you that this schist is too gritty and cost of concentration too high to permit of treatment; the graphite market is not good at present and many fair graphide deposits in Eastern Canada are said to be dormant at the present time.

I am,

Yours truly,

"J.D.GALLOWAY."

Provincial Mineralogist.
