

M Insp Rept. Sept. 75
OKANAGAN SUNSET QUARRY--Okanagan Lake

D. Smith

82L/3W.
SW-68

This area provided building stone for buildings in the Vernon area. The material was actually loaded on barges for transportation to Vernon as no roads were available. Presently the rock material being looked for will hopefully meet the demands of the architects in Victoria and Vancouver. If bulk sampling does meet expectations then orders for up to 8000 tons will be shipped.

On inspection, an area was being stripped for examination and preparations were being made to do some blasting to obtain bulk samples for shipping. Looking ahead, it will be necessary to crush this material for ease of handling.

82L SW068

The old quarry and immediate area receiving attention is on private land held by a retired doctor. Section 10-11 forms have been filed and other departments have been notified.
