News Release . . . Saskatchewan property dispositions

Mr W. Robert Bell reports

Further to news in Stockwatch March 30 1994 regarding agreement to sell a package of Saskatchewan oil properties for \$17.5 million, closing is scheduled for May 19 1994.

In addition, the company has closed two smaller Saskatchewan dispositions for \$4.0 million. The combined properties disposed of constitute less than half of United Rayore's Saskatchewan net revenue in the year ended December 31 1993.

Proceeds will be used to retire the company's \$8.4 million of bank debt. The remaining working capital of approximately \$0.50 per share will be utilized in United Rayore's horizontal drilling and recompletion programs in California and Saskatchewan.

News Release . . . Preliminary assessment completed on marble property

Mr George Stathis reports

Preliminary geological work has been completed on Van-City's granite and marble property.

The property consists of a 49 unit group of claims (over 3,100 acres) located a short distance from tidewater at Port Renfrew on southern Vancouver Island. The claims are 100% owned or under option by Van City. Access to the property is good.

The amount of potentially suitable high whiteness marble appears to be large. The Lorimer Creek section alone is 120 m wide by 1,500 m long and is exposed over a vertical height of 400 m. The potential of the claims of the Lorimer Creek unit with respect to white marble is greater than 10 million tonnes. There are two other thick sections of white marble on the Renfrew and Gordon claims with zones in excess of 8 million tonnes.

Emerging markets for high brightness pure carbonate (CaCO3) are mainly as fillers for paints, paper products and plastics. Overseas markets exist for fine coated paper surface materials which carbonate from the property could potentially provide. A near term aspect of the property is that the marble will provide the company with an inexpensive and secure supply of marble powder and decrease the company's reliance on outside suppliers.

There are large deposits of light jade green, dark green and black granite on claims 1 and 2. Samples have been cut and polished with excellent results.

More detailed sampling and diamond drilling is required to fully evaluate the claims. Recommendations are to diamond drill 2,000 feet in shallow holes.

RE: Van-City Cultured Marble Products:

I attach an extract from Canada Stockwatch May 3rd, 1994 (I hope it is legible) and a section of Mineral Titles Reference Map 092C068 (Gordon River Area, near Port Renfrew; 92C/9W).

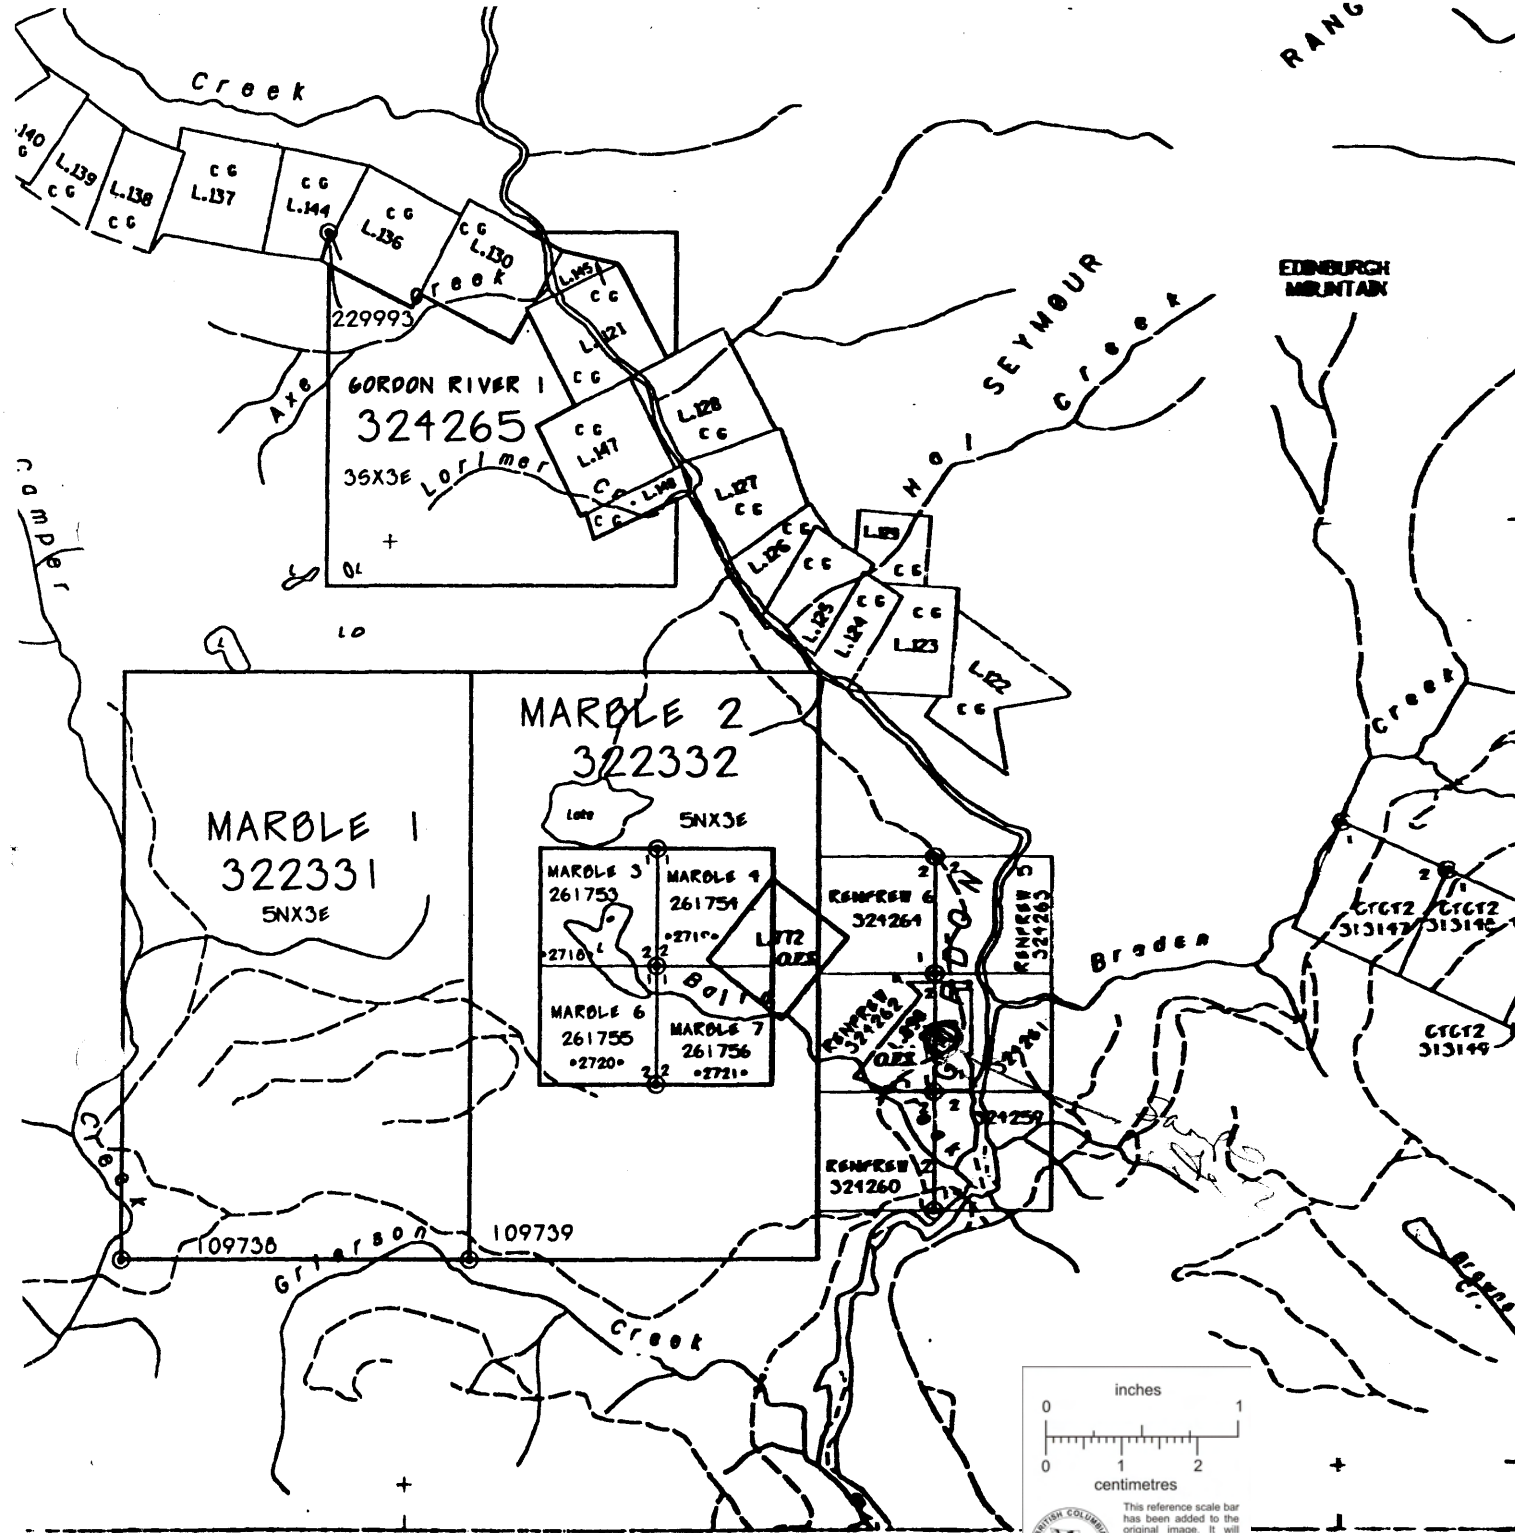

I don't have any previous record of the property. The release indicates that the ~~Gordon River~~, Marble and Renfrew claims are either owned or optioned by Van-City Cultured Marble Products and that they were submitted to some unspecified "preliminary geological assessment".

The news release was prepared by Mr. George Stathis (#426 West 27th Avenue, Vancouver, V5Y 2K3; FAX 270-9867). He is the registered owner of the Gordon River Claim.

I haven't spoken to Mr. Stathis, so I don't know whether his work programme justified a "Notice of Work". I would appreciate feed-back if you do contact him for clarification.
