PROPERTY FILE

THANK YOU FOR THE RESULTS ON YOUR DAY VISIT TO FORT RENFREW
MAY 9 2002. WE ALSO THANK YOU FOR THE COLORED ALTRAMAGNETIC
MAP OF OUR AREA AND EXPLAINING HOW NORM + ROBIN ROOKE
RECEIVED THIS MATERIAL FOR THEIR COURT CASES AGAINST US THIS
WINTER. AS I EXPLAINED TO YOU, THEY SIGNED A CONFIDENTIALITY
AGREEMENT TO ALLOW THEM TO STAKE 6 CLAIMS IN MY AREA OF
INTEREST WITH BOLIDEN, BEFORE BOLIDEN STAKED WHAT THEY
BELIEVE IS POSSIBLY AN UNPRECEDENTED DISCOVERY FOR VAN. IS
AND POSSIBLY ALL OF B.C (THEIR ^{SEE} REPORT INCLUDED)
THEY LATER SIGNED A BILL OF SALE, SELLING ME BACK THOSE 6 CLAIMS
FOR A 1% INTEREST EACH IN ANY MUTUAL STAKING AGREEMENT ARRIVED
AT WITH BOLIDEN.

I'M SENDING YOU A COPY OF THEIR REPORT, IF YOU HAVEN'T
SEEN IT? (CHIEF G.D. COMMISSIONER GIVEN A COPY LAST YEAR)

YOUR COMMENTS - "MORE PROSPECTING FOR SUCH DEPOSITS MAY BE
WARRANTED IN THE FORT RENFREW AREA"

AND
"RESULTS CONSISTENT WITH CALCIUM FESKARN *
DEPOSITS AS THE MINIFILE RECORDS SHOW THEM TO BE
NOT HIGH ENOUGH Pd TO INDICATE THE PRESENCE
OF MAGNETIC CU-NI-PGE MINERALIZATION.

SEEM QUITE TAME IN COMPARISON TO THE BOLIDEN REPORT
ON MY FINDINGS OVER THESE LAST 4 YEARS.

TO DATE - (BOLIDEN ^{HAS} COVERED ALL MY ASSAYING COSTS)

IN ANSWER TO THESE COMMENTS I WOULD LIKE TO
REFER TO BC MINIFILES 092C 141 (EAB) AND 092C 142 PAN ISLAND
(1980) (1984)

P.S. 4 YEARS AND A HALF
AGO I DISCUSSED THIS
WITH GEORGE NIXON
IT WAS NOT INCLUDED IN
HIS REPORT OR
MR LEECH'S (2000)
REPORT ON
PAM OCCURRENCES
IN B.C.

I HAD TO PHONE THEM
BOTH & THANK THEM

→ - 2ppm AND 3ppm Pd IN SOILS (PAN ISLAND
GRANITE CREEK)
→ - NI 660ppm CU 2500ppm Pt 75ppb Pd 520ppb (FAIRY
CREEK) (EAB CLAIM)
- MY OWN FINDINGS ASSAYED THRU BOLIDEN PRODUCED
THE SAME RESULTS ON 3 OTHER CREEKS ALONG
WITH 34 BODIES OF CUMULATE PERIDOTTITES IN CLOSE
PROXIMITY. THE SKARN IS A PART OF ULTRAMAFIC
INTRUSIONS FOUND ELSEWHERE IN THE WORLD.
BEFORE, BUT MAY HAVE BEEN LOST IN MY PERCEIVED PARTNERSHIP
WITH THE ROOKE'S COURT CASES WHEN YOU VISITED.
I STILL NEED YOUR HELP, IF ANY - GARY.
