92C/8E

PROPERTY FILE GEOLOGICAL MAP OF JORDAN RIVER AREA VICTORIA MINING DISTRICT B.C.

Scale 1 inch = 1000 feet.

Showing proposed road to the
Rossland M.C., Sunloch Mines

- Alluvium
- Sediments
- Gabbro
- Volcanics including diabase
- Boundaries Determined
- Boundaries Assumed

Note: Lapsed locations are dotted.

Contour Interval - 100'. Datum: V.I.P. Reservoir assumed elevation 1150 Feet.
 Contours sketched to show nature of topography. Contours not necessarily accurate.
 Elevations for Jordan River Canyon below Sunloch tunnels from climb surveys by F.C. Green, Victoria, B.C. Other elevations from aneroid readings.

- N.B.1. Coarse-grained volcanics & fine-grained gabbro very similar in appearance. In many places difficult to determine exact contacts.
2. Geology north & west of Viking 2. Claim approximate. Only reconnaissance work done on these claims.
3. The gabbro on Desolation Creek contains inclusions of volcanics. Inclusions not shown on map because positions were not accurately determined.
4. Bedrock in Jordan River Canyon above Sunloch Camp & along Winkler Creek below Olive Fraction covered by alluvium in many places. Alluvium not shown.
5. On Marlinah Creek above Olive Claim & on Desolation Creek above last volcanics shown, creekbeds were seen covered at time of examination.
6. Only cherty & porphyritic basalts considered in determining strike & dip of volcanics.

SECTION AA
looking approximately N50W.
Scale 1" = 1000'

NOTE: Central insetive, in general wider than shown in this section.
