June 20, 1978

Dr. W. R. Bacon,
Co-ordinator,
Accelerated Mineral Development Program,
Ministry of Mines and Petroleum Resources,
VICTORIA, B. C.
V8V 1X4

Dear Bill :

RE: ACCELERATED MINERAL DEVELOPMENT
APPLICATION

There has been a misunderstanding regarding Western Mines' application for a grant under the Accelerated Mineral Development program of the British Columbia Ministry of Mines and Petroleum Resources. Our application was intended for submission under the Accelerated Mine Development program, but somehow through an error in our office it was originally submitted as an Accelerated Mineral Exploration application - Can this be transferred into the proper category at this time.

Sorry for the inconvenience.

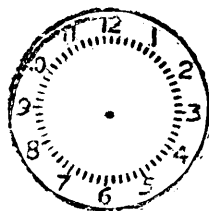

Best personal regards,

WESTERN MINES LIMITED

A. E. Soregaroli
Vice-President, Exploration

*HANDED TO MINISTER
"IN PERSON"*

Hon. J. R. Chabot
Minister of Mines and
Petroleum Resources
Government of the Province of
British Columbia
Parliament Buildings
VICTORIA, British Columbia
V8V 1X4

Dear Mr. Chabot:

As I mentioned to you during our meeting at the end of last year, we have had to cut back severely on mine development and exploration work at our Buttle Lake property to ensure a mine operating profit. Action taken since our December meeting has resulted in the loss of approximately 50 jobs at the Buttle Lake property.

For the ten years preceding 1977 sufficient new ore reserves were generally found each year to take the place of those mined and concentrated during the year. However, during 1977, the results of the exploratory program were negative and total ore reserves fell from 1,731,000 tons to 1,459,000. This is the largest decline in reserves in any single year since the mine commenced production in 1967.

The mine converted from principally open-pit ore to ore principally from underground operations in 1973. This change was of course accompanied by a sharp increase in mine operating costs. Fortunately, in late 1972 a small ore zone was discovered in the Myra Mine containing much higher values in metals, particularly silver and gold, than the regular grade of ore from the other ore bodies in the Lynx and Myra Mines.

The addition of the Myra High Grade ore each year, in varying quantities, served to raise mill heads sufficiently to provide a surplus of operating revenues over operating costs during the intervening six years when operating costs were escalating rapidly, due mainly to increasing labour costs. Now, however, it is estimated that the Myra High Grade ore will be exhausted by the end of 1980. None of the efforts to date have succeeded in finding additional

reserves of high grade ore. Current operating costs have now reached a point where, together with the depressed copper and zinc prices, the mine can no longer be operated at a profit with only regular grade ore.

To better understand ways in which the mine could be kept operating, the major shareholder, in March of this year, engaged three consultants, a mining engineer, a metallurgist and a geologist, to examine the mine and determine whether the mine's operation could be made more efficient by using different methods and equipment, etc., and to determine the potential for finding additional reserves of ore. The reports indicated little can be done to increase the efficiency or reduce operating costs at the mine. However, the consulting geologist, Dr. Paul Gilmour, a recognized worldwide authority on massive sulphide deposits of volcanogenic origin, has concluded in his report the following:

"Numerous exploration 'leads' exist in and around Buttle Lake mine. Accordingly, the chances that additional reserves of commercial tonnage and grade remain to be found might be described as excellent - although the subjective term 'excellent' cannot be quantified. Some of the exploration possibilities involve the Myra area, and what may be the horizon which contains the Myra High Grade ore, so there seems a reasonable chance that additional high grade material may be discovered. Once again, however, it is not realistic to try to predict what the 'chance' is."

However, recent (1976 and 1977) ore finding and development costs of \$8.26/ton all but exceed the mine's projected cash operating margin, and as stated earlier, to ensure a cash operating profit in 1978, the level of mine exploration and development planned for 1978 has been severely curtailed and is well below that of 1977. This action would most certainly lead to a reduction in tonnage milled and consequent further loss of jobs from 1981 on.

It is for these reasons, therefore, that application is being made for financial assistance pursuant to Bill 5 to fund an accelerated exploratory program at the Buttle Lake mine. It is our considered opinion, based both on our own observations and upon the study by Dr. Paul Gilmour, that a thoroughly comprehensive re-study of the mine geology, coupled with a carefully planned diamond drilling program, over a two year period, may succeed in finding the additional reserves of ore necessary to permit the mine to continue operating and might therefore not only slow down the rate of lay-offs of the workers but could permit in due course the re-employment of some of those already laid off.

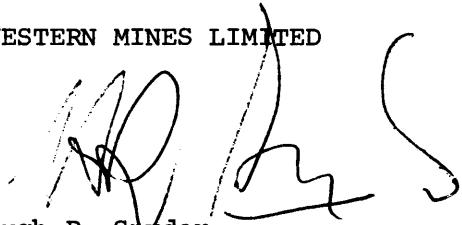

The proposed program, extending over the two years from mid-1978 to mid-1980, would involve the setting up of a new "Mine Exploration Unit" independent of the mine production geology staff and reporting directly to the Vice-President, Exploration, Dr. A. E. Soregaroli. The new unit would undertake a comprehensive review of the geology of the mine, with emphasis on stratigraphic and structural analyses, that could lead to the development of new concepts on which to base further exploration for new ore reserves at the mine.

The total program cost would be \$.75 million, of which, based on data forwarded to us, \$272,000 could be eligible for assistance pursuant to Bill 5.

Trusting you can give this matter your favourable consideration,

Yours very truly,

WESTERN MINES LIMITED

Ministry of Mines and Petroleum Resources
VICTORIA, British Columbia V8V 1X4

Dear Bill:

Re: Application for Accelerated
Mineral Exploration

Enclosed are two copies of Western Mines Limited application for an Accelerated Mineral Exploration grant from the British Columbia Ministry of Mines and Petroleum Resources for exploration work at the Buttle Lake Mine. Supportive data appended includes:

1. Excerpts from the 1978 Operating Budget of Western Mines Limited. This budget contains but one exploration item - all other items are strictly mine development. The Electric wireline diamond drilling totalling 2700 feet (823 m) was an extension of our 1977 program and was completed in March.
2. Proposed Exploratory Program - Buttle Lake Mine - 1978 to 1980. The first part of this proposed program has not been changed because we feel a program of the scope necessary to establish additional ore reserves at the Buttle Lake Mine will require more than one year to achieve its goals.

Part 2 of the proposal is a somewhat detailed outline of our program covering the 10-month period from June, 1978 through March, 1979. You will note a few changes from an earlier draught. Diamond drill charges have been raised to \$18.00 per foot due to bids received from drilling contractors.

Additional moneys will be expended on chemical analyses of rock samples required to help establish marker units within this complexly altered and deformed pile of volcanic and sedimentary rocks.

Should you require additional information or supportive data, please do not hesitate to call.

Yours very truly,

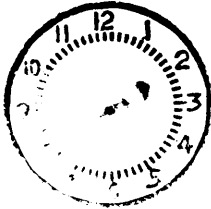

WESTERN MINES LIMITED

Dear Bill :

RE: BUTTLE LAKE EXPLORATION

DEPT. OF MINES
AND PETROLEUM RESOURCES

The exploration program at Buttle Lake is progressing well - though not very successfully yet. During the course of exploration, we've had to alter our program. As you well know, one drill hole can immediately change the orientation of any one phase of the program.

In the Price area we had originally contemplated about 3000 feet of diamond drilling (4 holes) around a high-grade gold-silver intercept in a previous hole. One of these holes intercepted 3.8 feet grading 0.23 oz. Au, 10.65 oz. Ag, 1.9% Pb and 3.5% Zn - obviously necessitating additional drilling. The end result was eight drill holes totalling 7159 feet in the Price area - without further encouragement. However, for the first time at Buttle Lake our geological exploration staff have been able to define some of the volcanic stratigraphy in the Price area well enough to predict stratigraphic intercepts in drill holes. This is a very important breakthrough - due largely to Rick Walker our project geologist. With this handle on the stratigraphy, the presence of rhyolites in the package, and our "crunch" on ^{finding} new reserves at the mine, we decided to expand the drilling project to complete our surface evaluation of the entire Price area. Thus we expanded our drill program to 14,000 feet. To accomplish this, we decided to :

1. reduce the Philipps drilling to 4000 feet from 6000 feet.
2. redirect the underground drilling budget to Price surface drilling (underground drilling will be rescheduled for 1979).
3. acquire additional funds from Western Mines Limited, The Board of Directors have provided an additional \$120,000 for the project, bringing Western's contribution to about \$340,000. B.C.D.M. commitment remains at \$182,500.

With the increased footage at Price, we moved a second drill on the property in September to drill two surface holes in the Philipps area. Drilling must be completed here before the snow flies, because the rapid accumulation is a major problem and eliminates the necessary helicopter support. Once the snows start, the weather usually closes in and prevents further work.

Geological studies have been progressing slowly - our two geologists are hard-pressed to keep up with the drilling program. As a result we have hired another geologist for the project, Dr. Jahak Koo, and we may add additional staff to really hit the geology hard.

This is a very brief summary of our project, but I will be happy to elaborate when we can visit the project in the near future.

Best regards,

WESTERN MINES LIMITED

A. E. Soregaroli
Vice-President, Exploration

APPENDIX I

The proposed program would include the following:

<u>Year 1978/1979</u>	<u>Labour Content at \$10/hour</u>	
1. Geologist, with experience in the study of massive sulphide volcanogenic type deposits. 12 months at \$40,000 Expenses at <u>5,000</u>	\$ 45,000	\$ 21,000
2. Transfer of one mine geologist from production geology to exploration geology. 12 months at \$32,000 One technical assistant 12 months at <u>\$20,000</u>	\$ 52,000	41,000
3. Four surface located diamond drill holes, helicopter serviced, totalling 3,000 feet and averaging 750 feet in depth, in the Price Creek Block, as a follow up to the high grade intersections (gold -.59 ozs. and silver 17 ozs.) encountered in surface drill hole, P.R. No. 7 at a depth of 590 feet. Estimated cost:		
Drilling at \$15.00 per foot = \$45,000		say 15,000
Helicopter, 30 hours at \$400 per hour = <u>\$12,000</u>	\$ 57,000	300
4. Mobilizing and demobilizing diamond drill and drill crew	\$ 3,000	say 1,000
5. Two surface located diamond drill holes, helicopter serviced, totalling 6,000 feet, in the western portion of the Lynx Mine and near surface drill hole W73, to follow up the ore grade mineralization intersected in that hole at a depth of 2,573 feet which lies approximately 2,000 feet west of present underground workings. Estimated cost:		
Drilling at \$15.00 per foot = \$ 90,000		say 20,000
Helicopter, 50 hours at \$400 per hour = <u>\$ 20,000</u>	\$110,000	500

6.	Ten thousand feet of underground diamond drilling (Wire line \$8.00, conventional \$3.00)		
	Estimated cost:		
	Drilling at \$6.00 per foot	\$ 60,000	say 20,000
7.	Rock geochemistry analyses, assays, supplies, etc.	\$ 18,000	
8.	Fee and expenses of Dr. Paul Gilmour for four visits to mine to review and provide guidance for the geological studies at the mine, estimated at \$3,500 per visit	<u>\$ 14,000</u>	
	Total Year 1978/1979	<u>\$359,000</u>	<u>\$128,800</u>

Year 1979/1980

1.	Geologist, with experience in studying massive sulphide volcanogenic type deposits. 12 months at \$40,000 Expenses at <u>5,000</u>	\$ 45,000	21,000
2.	Transfer of mine geologist to exploration 12 months at \$32,000 One technical assistant 12 months at <u>\$20,000</u>	\$ 52,000	41,000
3.	Five surface diamond drill holes in area between the Lynx and Myra mines and in the vicinity of massive sulphide intersections encountered in surface holes W-37, W-39, W-75 and W-78, totalling 5,000 feet conventional surface drilling. Estimated cost: Drilling at \$15.00 per foot	\$ 75,000	say 25,000

4.	Mobilizing and demobilizing diamond drill and drilling crew	\$ 3,000	say 1,000
5.	The possibility for a repetition of the 'G' Zone existing south of the 'S' Zone would be critically studied and drilling undertaken to find the other side of the structure. Four surface drill holes totalling 3,000 feet. Estimated cost:		
	Diamond drilling at \$15.00 per foot = \$45,000		say 15,000
	Helicopter, 30 hours at \$400 per hr. = <u>\$12,000</u>	\$ 57,000	300
6.	Resolution of the geological structure of the Myra block by drilling to locate the other side of this structure, which could have mineralized zones associated with it, as is the case in the Lynx mine. Four drill holes, totalling 3,000 feet at an average cost of \$10.00 per foot, (partly surface drilling). Estimated cost:		
	Diamond drilling at \$10.00 per foot	\$ 30,000	say 10,000
7.	Fifteen thousand feet of underground diamond drilling at average cost of \$6.00 per foot Estimated total:		
	Diamond drilling at \$6.00 per foot	\$ 90,000	say 30,000
8.	Cost of rock geochemistry analyses, assays and supplies	\$ 18,000	-
9.	Fee and expenses for Dr. Paul Gilmour for four visits to mine to review and guide the geological studies at the mine, estimated at \$3,500 per visit.	<u>\$ 14,000</u>	
	Total Year 1979/1980	\$384,000	\$143,300
	Brought forward for 1978/1979	<u>\$359,000</u>	<u>\$128,800</u>
	TOTAL TWO-YEAR PROGRAM	<u>\$743,000</u>	<u>\$272,100</u>

Dear Sirs:

Re: Accelerated Mine Development
Accelerated Mineral Exploration
Bill 5 Program - Ministry of
Mines and Petroleum Resources

The successful applicants for Accelerated Mineral Development grants have been notified of the amounts of their grants and the Ministry has received monthly accounts from seven of the companies receiving grants.

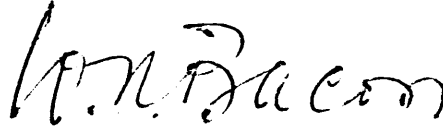

For those companies with grants who have yet to initiate the procedure of monthly accounts, we enclose another brochure and draw your attention to the terms and conditions outlined on pages 2 and 3. Specifically, we want to emphasize the following:

1. You may consider your grant for "x" dollars to be in place, which it is, but you will receive only an amount that is a total of the accounts you turn in to the Ministry--and these accounts will be only for salaries and wages and then only to a maximum of \$10 per hour (including fringe benefits), and will not include bonuses and overtime.
2. Your accounts should "include an employee list, Social Insurance numbers, hourly rate, number of hours worked."
3. The end of the fiscal year is March 31, 1979 and, therefore, this is the end of the Accelerated Mineral Development program. Accounts for March 1979 will be honoured by payment in April 1979.

Please signify receipt of this letter by signing the enclosed copy, having it witnessed, and returning it to this office at your earliest convenience.

In closing I wish to point out that the amount of your grant is an estimate, based mainly on your application. It is a maximum figure and what you actually receive will be based on the accounts you submit--which may be scrutinized by a person from our Accounting Branch at some unspecified time.

Yours truly,

W. R. Bacon
Co-ordinator

Dear Sir:

This letter is confirming our meeting in Victoria of December 20th and that I have authorized a grant in the amount of \$100,000 for the construction of a road from the Price 13 level adit up to PR 7.

The grant will consist of two \$50,000 payments - February 28th and March 31st, 1979.

Yours truly,

W. R. Bacon

Dear Sirs:

Re: Western Mines Limited
Accelerated Mine Development Program

Mr. Ross A. Mitchell, Comptroller of the above noted company has requested that confirmation be made directly to you, of the amount of funds paid, and approved to be paid to the company under the terms of the above noted program.

It is certified that funds in the amount of \$91,481.94 have been paid, and funds in the amount of \$43,183.48 have been approved for payment. These amounts totalling \$134,665.42 are in respect to the participation by the company, up to 31 December 1978 in the Accelerated Mine Development Program.

A copy of Mr. Mitchell's letter is attached.

Yours very truly,

R.R. Davy,
Director,
Finance and Administration.

Dear Dr. Bacon :

RE: ACCELERATED MINE DEVELOPMENT PROGRAM

Our auditors, Messrs. Coopers & Lybrand, P.O. Box 11128, Royal Centre, 1055 West Georgia Street, Vancouver, B. C. V6E 3R2, of the above named program have asked that you confirm the amount of total capital contributed to the program by yourselves for the year ended December 31, 1978.

According to our records your total contributions for 1978 were \$91,481.94. An additional amount of \$43,183.48 was owing by you (statement attached) at December 31, 1978. Would you please confirm your agreement with these amounts by signing in the space indicated below and returning this letter direct to our auditors in the envelope enclosed. We also enclose a copy of this letter for your records.
