Dear Sir:

RE: B.C. MINERAL EXPLORATION REVIEW 1992

Preparations are underway for the 1992 Mineral Exploration Review for southwestern British Columbia and the 1992 Producers and Potential Producers, Mineral and Coal map. The objectives of the map and review are to provide an overview of exploration activity within the Province and to highlight particularly promising properties and new trends. Both are based in large part on company results; therefore, I am asking for your assistance in providing information about the property which you are exploring/developing.

On the enclosed form, please list the work done in 1992 on the CIH #1 & 2 properties. A summary of significant results would be most helpful.

If development on your property has reached the stage where estimates of reserves are available, please provide current figures using the second attached form.

We are working to a late October deadline and would appreciate your response by October 25th. Your information can be faxed or mailed to the above number/address. Please note that our fax number has been changed to (604) 775-0313 and I can be reached at (604) 660-0223 if you have any questions.

The Mineral Exploration Review will be available at the Cordilleran Roundup in February. See you there!

Thank you for your assistance.

Sincerely,

Robert H. Pinsent
