January 3rd, 1935.

Robt. Dunn, Esq.,
Deputy Minister of Mines,
Victoria, B. C.

Sir: re Money Spinner Gold Mines, Ltd.

In connection with the above Company I beg to enclose a brief interim report of the property of the Money Spinner Gold Mines, Ltd., Fire Lake, New Westminster Mining Division.

This report, as you will appreciate, is very little more than a brief statement of conditions at the property at the date of examination.

I trust this will be of service.

I have the honour to be,
Sir,
Your obedient servant,

A. M. Richmond

Resident Mining Engineer.

PROPERTY FILE

PRELIMINARY REPORT ON THE PROPERTY OF
THE MONEY SPINNER GOLD MINES, LTD. BY
A. M. RICHMOND
RESIDENT MINING ENGINEER

The property of the Money Spinner Gold Mines, Ltd., N.P.L., comprises the following claims: Money Spinner, Wonderful, Prince, Golden Queen, Tellurium, Free Gold, Baby, Neptune, and Star claims, the latter covering a water-power site at the outlet of Fire Lake.

The claims are situated immediately north of Fire lake on the south slope of what is known as Fire mountain. Fire mountain is reached by a 16 miles trail from Tipella, a landing place at the north end of Harrison lake in the New Westminster Mining Division. Tipella is 42 miles by boat from Harrison lake and Harrison lake is approximately 90 miles by road from the City of Vancouver.

The principal workings of the property are located on the Money Spinner claim at an elevation of 4900 feet above sea-level. The accompanying sketch-map shows the location of the claims owned by the Company, while the sketch drawing by Mr. James Rutherford of Victoria, indicates the workings on the main vein or Money Spinner vein.

An adit tunnel at 4,900 feet elevation is stated to have been driven 420 feet but the writer was unable to examine more than the first 250 feet of this on account of a cave at that distance in from the portal. At about 83 feet in from the portal of this No. 1 level a winze was put down on the vein for a distance of 84 feet and from the bottom of this winze two short drifts aggregating 35 feet in length were extended along the strike of the vein. At 138 feet in from the portal a raise was up 80 feet following the vein almost to the surface. Two small stopes have been excavated near the bottom of this raise.

The level as examined shows a well-defined fissure vein between altered greenstone walls. The vein is well banded and mineralized with small amounts of pyrite and occasionally small amounts of free gold can be found along the banded fracturing in the vein filling. The vein averages approximately 4 feet in width, striking almost north and south with a dip of 50° to 40° to the west.

In the bottom of the above mentioned winze there is evidence of a concentration of sulphides and it is from this place that it is reported by former owners that excellent values in gold were recovered.

PROPERTY FILE

When the property was visited a crew of three men were engaged, under the supervision of Mr. Fred Bradley, in collaring the No. 2 adit level tunnel at an elevation of approximately 125 feet below the No. 1 level. This new tunnel was in 16 feet in slide rock and over-burden.

Comfortable tent camps have been erected and much of the old timber in the milling plant formerly operated at this property was being salvaged.

The vein is quite strong and the presence of good gold values at places in the vein is sufficiently encouraging to warrant further work in thoroughly sampling the vein as exposed and cleaning out the workings beyond the wave on the No. 1 level.

A fairly short cross-cut and drift on the new No. 2 level would definitely establish whether or not minable values are located below the winze level from the No. 1 level.

MONEY SPINNER GOLD MINES LIMITED

President:
John L. Noble

808 Stock Exchange Building
Vancouver, B. C.

December 18, 1934.

The Honourable G. S. Pearson,
Minister of Mines,
Victoria, B. C.

Dear Mr. Pearson:

Some few weeks ago Mr. Richmond, your resident Engineer, visited the property of Money Spinner on Fire Mountain. A number of those connected with our Company, knowing that Mr. Richmond has been there, are quite interested in his report. I have been told that if permission is given by the Minister that the Engineer could give us a temporary report. Of course we have no intention of using this report for financing purposes or publication.

It would be much appreciated by our Board of Directors if you would favorably consider our request, and if you are agreeable would you kindly ask Mr. Richmond to forward us a copy.

It is some considerable time since I have had the pleasure of seeing you. I trust you are enjoying the best of health and with warm personal regards, I am

Yours sincerely,

"JOHN L. NOBLE."
