FAIRFIELD MINERALS LTD. (FFD-V)

NEW GOLD SHOWINGS - John W. Stollery, president
NEAR SUMMERLAND, B.C. reports Fairfield Minerals Ltd.

82ENW has located two gold showings in
a stockwork setting within altered granite and Tertiary
porphyritic rocks on the 100% owned Elk gold-silver
property, 25 miles west of Summerland, B.C.

The showings have been only partially exposed by hand
trenching. Continuous channel samples across quartz
veins and altered host rocks have returned values up to
1.06 oz. gold/t across 2.8 ft., and a grab sample assayed
2.83 oz. gold/t. The second showing, located 3500 ft. to
the north, has provided channel samples grading up to
0.60 oz. gold/t and 5.7 oz. silver/ton across 3.1 ft. A
continuous chip sample along 2.8 ft. of quartz vein
assayed 1.89 oz. gold/t and 11.0 oz. silver/t. Further
exploration will be undertaken as soon as field
conditions permit.
