

LEGEND

QUATERNARY

1 Pleistocene & Recent: Glacial and stream deposits; till & gravel
unconformity

2 Tertiary: granite porphyry like
intrusive contact

CRETACEOUS

3 Cretaceous: granodiorite and quartz-diorite

TRIASSIC (Nicola Group)

1a Andesite and diorite, non-porphyrific

1b Porphyritic andesite flows with phenocrysts of hornblende and augite

1c Volcanic breccia, angular fragments of andesite and limestone in tuffaceous groundmass

1d Tuffaceous volcanic rocks: fine-grained grey, thinly bedded

.....

USE OF SYMBOLS

roads and trenches

stream showing direction of flow

geological contact observed

fault inferred

geological contact inferred

geological contact assumed

cliff

glac-post

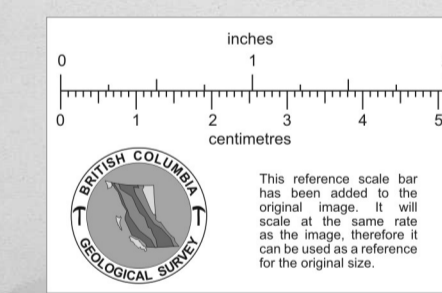

talus-covered areas

trail

area of bedrock outcrop

rock-geochemical sample-site

mineral occurrence
