

TRUE NORTH

LEGEND

- Overburden
- Syenodiorite porphyry & Latite porphyry, in places with altered volcanic rocks
- Schistose volcanic rocks & argillite of the Nicola Group
- Creek or gully
- Trench
- Jeep road
- Fault with dip
- Dip of schistosity or bedding

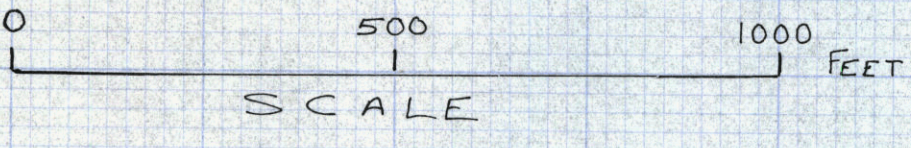

Area containing observed copper & magnetite mineralization

Humphrey & Aird (Utah) recognized an intrusive-Nicola contact followed by the alteration zone NNE through the trenches.
