Re: Princeton, B.C. samples

| Sample | CEC cmol(+)/kg | %Clinoptilolite |
|--------|-----------------------|----------------------|
| 1 | 134.05 | 60.93 |
| 2 | 101.60 SURFACE SAMPLE | 46.18 SURFACE SAMPLE |

Note: The units used for CEC are currently "centimoles of +ve charge per kilogram of sample" (cmol+/kg). CEC values are also commonly expressed as "milliequivalents of +ve charge per 100g of sample" (meq+/100g) which is the same as cmol+/kg.

Virginia Marsille-Kerslake
Assistant Laboratory Manager
