- |  |   |          |                                 |
|--|---|----------|---------------------------------|
|  | Quartz Diorite                                    | Inclined | Vertical                        |
|  | Monzonite, Quartz-Norite, Diorite, Quartz Diorite |          | Foliation or Orogenic lineation |
|  | Hornblende Diorite                                |          | Dike                            |
|  | Hornblende  |          | Fault with striations           |
|  | Hornblende Pyroxenite                             |          | Bedding, Banding, or Contact    |
|  | Pyroxenite (Hypersthene)                          |          | Jointing                        |
|  | Metasediments (Schist, gneiss, hornfels)          |          | CONTACTS                        |
|  | Disseminated Sulfide Area                         |          | Observed                        |
|  | Massive Sulfide Mineralization                    |          | Inferred                        |
|  | Pyroclastic and Pyritic                           |          | Hypothetical                    |
|  | Talc-Serpentine Alteration                        |          | Trail                           |
|  | Utilization                                       |          | Outcrop Areas                   |
|  |   |          | Talus or Dump                   |
|  |   |          | Specimen Number                 |

DEEP GLACIAL DRIFT  
REMOVED BY UNDER LAIN  
LARGELY BY SCHISTS
