92HSW083

(92H/5W)

(Fig. E-1, NTS 92H, No. 70) ZION: Lat. 49° 22′

NEW WESTMINSTER M.D. Approximately 11 kilometres northwest of Harrison Hotsprings and 2 kilometres northwest of Weaver Lake.

CLAIMS:

OWNER:

METALS:

I AM 1 to 4, 9 to 24, SIR 4, SIR 5 and 6 Fractions, MARY J 1 to 4. DOT 1 to 3.

AMAX POTASH LIMITED, 601, 535 Thurlow Street, Vancouver V6E 3L6.

Copper, zinc, lead.

DESCRIPTION: The claims lie within a section of moderately and southerly dipping volcanic rocks and overlying volcaniclastic sedimentary rocks of the Jurassic Harrison Lake Formation. A band of rhyolite hosts minor zinc-copper-lead-pyrite mineralization in vugs, fractures, and disseminated patches.

1976
