Attention: Mr. W. J. McMillan, Ph.D., P.Eng.

Dear Bill:

Re: CIM Special Volume No. 15
- Porphyry Deposits of the Canadian
Cordillera

Enclosed herewith is the following data relating to both the Maggie and Highland Valley papers:

- (1) Three copies of the first draft of the "Geology of the Maggie Porphyry Copper-Molybdenum Deposit" by D.C. Miller. The author's biography has not been included but will be forwarded shortly. Copies of the drawings that accompany this paper are also included.

There will also be a photograph of a core sample detailing the biotite quartz monzonite porphyry that will be forwarded next week as it is still in the printing stage.

- (2) Three sets of prints of the drawings that will be accompanying Joe Briskey's paper on the Geology of the Bethlehem deposits. The paper is to be forwarded directly to you by the author.

It should be noted that all the prints represent a composite reproduction of both the base linework drawing and the patterned overlay. When the final drafts are due for submission we will forward the original mylars. The figures have not yet been numbered or referred to in the text but this will be done in time for the second draft.

...2

We look forward to your comments and trust the delay in sending this information has not been too inconvenient.

Yours very truly,

BETHLEHEM COPPER CORPORATION
