

GEOLOGICAL MAP OF THE MAKAOO, GALAXY & INLAND PROPERTIES, KAMLOOPS AREA, B. C.

- 92192/106
- LEGEND**
- MIOGENE OR EARLIER**
- KAMLOOPS GROUP: primarily basalt, andesite
- JURASSIC (?)**
- IRON MASK BATHOLITH: primarily diorite(D) diorite porphyry (D)
 - IRON MASK BATHOLITH: primarily "albitized" diorite
 - IRON MASK BATHOLITH: primarily pyroxenite, some diorite
 - IRON MASK BATHOLITH (?): peridotite, olivine, basalt (probable Anorthite)
- UPPER TRIASSIC**
- NICOLA GROUP: andesite flows, breccias, tuffs; minor basalt, argillites, argillaceous limestones.
- Fault zone, shear zone. ~?~ assumed fault zone
- Joints — apl = diorite aplite(?) veins & vein dykes.
- Geological boundaries
- cp = chalcopyrite, mag = magnetite, apl = aplite, qtz = quartz vein
