

009698

PROPERTY NAME: HAWK, SHRIKE, CONDOR, etc. NO. OF CLAIMS: 9 MINING DIVISION: KAMLOOPS

CLAIM NAMES: HAWK, SHRIKE, BAT, FALCON, CONDOR, etc. (see map) EXPIRY DATE: Feb. and Mar./77

LOCATION AND ACCESS: Claims located between Jocko & Edith Lakes 2 miles SE of Knutsford, B.C. Access is excellent via the Lac Le Jeune Rd. and Goose Lake Rd.

OWNER: Mike Dickens ADDRESS: P.O. Box 116, SAVONA, B.C., ph. 373-2554

DEAL ASKED: \$100.00/unit plus retained interest

PREVIOUS WORK: Property previously held by Rolling Hills. They conducted a

Mag. & I.P. survey over the Shrike, Bat, and Falcon claims. Percussion drilling by Calico Silver in 1972 on the Falcon and Bat claims.

ORE POTENTIAL Low. Cp mineralization observed on Hawk claim related to shearing.

DESCRIPTION: Majority of claim group underlain by Nicola Group rocks

consisting largely of pyroclastics with some interbedded flows. Intrusive

Iron Mask rocks of dioritic composition crop out north of Jocko Lake marking

the margins of the Iron Mask batholith. Chalcopyrite mineralization was

observed along a lineament north of Jocko Lake and at the old Fargo showing

situated on the Edith Lake road (Condor #3 claim). However in both cases the

the mineralization appeared related to narrow shearing. The owner had not

prepared any map locating the showings so we were lead to spots he had found

while staking. Location-wise the claims are excellently situated in relation

to Cominco's AJAX showing, virtually abutting their reported 10 M.T.(0.5%Cu)

deposit. Percussion drilling results of the Calico drilling reported abundant

pyrite in cuttings.

RECOMMENDATIONS: I recommend that C.S.E. do not proceed further with this

property. This recommendation is based on the fact that fairly extensive

work has been done in this area resulting in only one sub-economic showing-

the AJAX. I feel that our exploration monies would be better spent investigating

potentially economic showings north of this area related to proven ore-bearing

structures (Galaxy, Sugarloaf, etc.).

Mr. M. Dickens,
P.O. Box 116,
Savona, B.C.

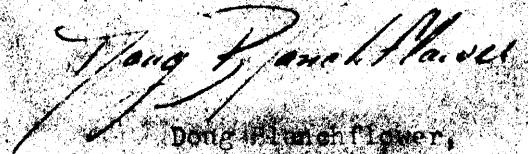

Dear Mike,

Please find enclosed your mineral claim data and maps for the Kestrel and Jocko Edith Lake properties. C.S.E. has decided not to negotiate an option on either property.

Personally I feel that both properties are exceptionally well located in relationship to economic and potentially economic copper deposits. ~~But~~ we will be able to option these properties very soon.

I appreciate your submittal of these two properties to C.S.E. for examination and hope that you will consider us in any of your future ventures. You can contact me anytime in this regard.

Yours truly,

Doug R. McPherson,
Geologist
