Dr. W. McMillan  
Geologist  
B. C. Department of Mines  
Victoria, B. C.

February 27, 1974

Dear Bill:

Please find enclosed at long last some geological data on our Greenstone Mountain Property. We have not done any work on the property since 1970, but we optioned it out in 1972 to a small company that drilled a series of percussion holes (P-72-1, etc.). Our holes are P-70-1, etc. I think you will find this data of some assistance in your mapping. If you are interested in a guided tour of the property, I will be very pleased to show you around. Such a trip would fit into my schedule best if undertaken about the middle of May or after September 15th. Should you require additional geological information please feel free to contact us.

Yours very truly,

  
R. U. Bruaset  
Geologist  
Western District Exploration

RUB/vw  
Encl.
