Mr. A.M. Richmond,
Assistant Resident Mining Engineer,
Victoria, B.C.

Dear Sir:-

I am sending you by parcel post a sample of Magnesite taken from my claim situated on the Campbell Range a few miles from Kamloops and known as the Ideal Magnesite Mineral claim and recorded by me on November 27th. at Kamloops, F.M.C. No. 74822 D. I would appreciate a report on same as to quality, demand and market price of same if any.

Thanking you in advance,

I remain yours very truly,

W. M. Docker.

Wm. M. Dicker, Esq.,
P.O. Box 909,
Kamloops, B.C.

Dear Sir:
re Hydromagnesite.

Further with reference to your letter of December 5th, and the sample of hydromagnesite sent in at that time I beg to advise that the sample contained:

Insoluble material	5.1%
Iron oxide (Fe_2O_3)	2.0%
Alumina (Al_2O_3)	0.5%
Calcium Oxide (CaO)	Nil
Magnesium carbonate ($MgCO_3$)	76.5%
Water (H_2O)	16.1%

This is not a particularly high grade quality of magnesite.

Yours very truly,

Non-Metallies Engineer.
